Mila: the company

Mila is a company at the intersection of healthcare, music and education which develops digital therapeutics for neurodevelopmental disorders.

While waiting lists for Specific Learning Disorders therapy are reaching 6 to 18 months, there is a crucial need for innovation in care to improve patient early care and therapeutic continuity. We developed Mila-Learn, a downloadable software as medical device application built upon the rich neuroscience literature of recent years dedicated to the implications of auditory and rhythmic stimulations on the strengthening of connections between distant brain areas.

Mila-Learn intends to provide an early treatment for children with Specific Learning Disorders and to increase therapeutic continuity through a software that can be used autonomously at home as an adjunct to clinician supervised treatment (speech therapy and psychomotricity). Thanks to our partners (Warner Music Group, Disney and Sony...), we've reshaped therapy into a rich, non-medicated and non-stigmatizing experience for the child.

Resulting from interdisciplinary research, Mila was founded at École Polytechnique in 2018 and has developed in France and in the US. We support over 6000 young patients through our partners such as the French Federation of Specific Learning Disorders.

Responsibilities

We are looking for a Medical Director to join the team in order to define and implement Mila's clinical research and investigational affairs.

Expected responsibilities :

- In-depth patient journey analysis to understand friction points in current care and the role of each party (*health professional, caregiver, institutions...*)
- Position Mila-Learn in the care pathway to have the greatest impact
- Define and lead the scientific, medical and medico-economic roadmap to launch including
 - Establish the needs in terms of clinical evidence
 - Define appropriate endpoints and set up clinical studies to generate evidences
 - Manage the CRO and investigators.
- Ensure a strong inclusion of patient associations and healthcare federations in the development of Mila.
- Promote a dynamic and creative cooperation among members of the Scientific Board.

The area covered is the United States and France, with attentive vigilance to European regulatory evolutions.

Medical Director

Location: Paris / remote

www.mila-learn.com

About you

- Doctorate in medicine or science.
- Demonstrated experience in clinical development program management
- Strong problem-solving skills with ability to propose creative solutions
- Experience in interactions with patient associations, scientific researchers and Competent Authorities. Proactive and enthusiastic approach to collaboration with partners.
- Strong communication skills and capacity to vulgarize scientific information
- International experience or strong international interest.
- English proficiency

Existing knowledge in speech therapy, neuropsychology or specific learning disabilities would be a great additional asset. Consulting or part-time contracts will be considered.

If the job description doesn't exactly match what you do, or if it's just what you want to do in the future, whether or not you think you have all the prerequisites, we strongly encourage you to apply!

It would be a great fit if you are

- Benevolent and attentive to others
- Curious and like to learn continuously, regardless of your seniority.
- Enthusiastic about teamwork with a focus on transparency above all else.
- Driven by helping kids and their families

Mila provides a challenging and supportive work environment.

We're offering you:

- The opportunity to join a small team of 10 people that is expected to double during 2021.
- A competitive salary and stock options.
- The necessary equipment to allow you to do your best work.
- A very flexible and remote-friendly work environment.
- Excellent health coverage for you and your family.
- Meal tickets and sport membership contribution to take care of your health
- To use your skills for a social and educational cause: we draw our motivation from the feedbacks of families and children..

Apply

We process applications as they come : <https://apply.workable.com/j/229B629707>

Process : Application screening → 1st call → Technical interview → Call with 2 to 3 members of the team to assess cultural fit → Lunch with all the team → Welcome onboard!
