

Job Title - PROCESS DEVELOPMENT LEADER (BIOLOGICS)

Sector: Pharmaceutical

Salary: £ Highly Competitive

Contract Type: Permanent

Location: EU,UK

Department: Research & Development

Summary

This is an exciting opportunity for a dynamic professional to join our R&D team at a time of expansion within the company. The successful candidate will report to the Head, Global Research & Development.

The Company

ECO Animal Health is a global organisation, headquartered in the UK, specialising in veterinary pharmaceuticals and biologics, predominantly for production animals. The company is highly profitable and well established with over 20 years of experience operating in the animal health sector.

The Role

The successful candidate will be responsible for the planning, design, and execution of manufacturing process development for veterinary biologics.

Specific Responsibilities:

- Provide technical leadership for the design and execution of industrial production processes for biological active ingredients and vaccines/biologics in compliance with regulations
- Provide support to R&D in selecting production technologies that are suitable for industrial scale production.
- Provide technical support for the selection of key raw material suppliers (adjuvants, culture media, animal origin raw materials).
- Provide technical support to contract manufacturing organizations (CMOs) selection and qualification
- Effectively manage CMOs and external consultants to support the planning and execution of process and assay development activities
- Design and execute scaling up activities with CMO partners.
- Lead tech transfer activities between CMO partners in the same or different geographies
- Support the preparation of documents for the regulatory submissions
- Maintain in-depth knowledge and understanding of the relevant scientific and technical literature as well as an awareness of new technologies available.

Experience and Skills

- A life sciences degree is required, and a post-graduate qualification is highly desirable.
- Relevant experience in manufacturing process development for vaccines (minimum 3 years) and in the animal and/or health industry (minimum 5 years).
- Good knowledge of GMP and USDA requirements.
- Experience in assay development and validation is desirable.
- Good team-player skills
- Clear communication in written and spoken English.

This is an excellent opportunity to join a financially successful company, headquartered in North London. We are offering a competitive salary and benefits package that includes private health insurance, performance related bonus and share options.
