Object: Endorsement of the Toxi Safe® Green Deal project

Toxi Safe® aims to support the largest number of brands as possible to make products and lines, without any significative impact on aquatic and terrestrial ecosystems, available on the market.

The Toxi Safe® Green Deal consortium gather experts in many domains including ecotoxicology, safety assessment, regulatory expertise, science and testing, products development and manufacture, and communication. All these consortium members are united for the safety of the Environment.

This project has the potential to develop new scientific tools allowing a realistic ecotoxicological risk assessment of products and products mixtures. It has also the potential to participate in the development and improvement of the European regulation.

The Toxi Safe® concept and methodology were tested during a year with cosmetic products and the redaction of a dossier within the European Green Deal framework is in progress.

Association Ori Hei Tiare certifies to support the Toxi Safe® approach set up by Toxi Plan®, in the context of the European Green Deal.

Signature preceded by the mention "Read and approved".

Name and function :
Date: January 26 ^h 2021

Eddy ETAETA
Président de l'Association Ori Heitiare Tahiti

This Endorsement letter constitute a proof of acknowledgment regarding the acceptance of the Toxi Safe® Green Deal project.
