

100 %

dedicated to the Pharma and Biotech sector

ABOUT US:

For nearly 15 years, the largest laboratories in the world have been showing their confidence in our company. Specialized in pharma, biotech and medical devices, we support our customers from research to product launch. We cultivate a human-scale company spirit that allows us to personally follow our 350 employees – each of them known for their technical and scientific expertise. Through our regional subsidiaries in France, Belgium and Switzerland, we offer everyone geographical stability, without a mobility clause in the contracts.

JOB DESCRIPTION:

CONSULTYS BENELUX is looking for an **Analytical Development Specialist** to reinforce its Consulting team. As a consultant you will bring your expertise to our customer team. For this particular project, the main objectives are:

- ❖ Validate analytical methods to support projects in development in different phases of product development
 - ❖ Perform analyses of raw materials, intermediate products, in bulk or packaged finished products in accordance with work instructions and established procedures (stabilities, in-process control, clinical release, investigation, ...)
 - ❖ Ensure stability analyses and clinical release for clinical phases I and II, as well as any analyses in support to process understanding (IPC test, forced degradation study, multimedia dissolution, ...)
 - ❖ Analyse results with readiness to criticize and ensures the consistency of these results with earlier data if relevant
 - ❖ Participate to analytical exercise transfer to QC and subcontractors
 - ❖ Respects the procedures and reports any discrepancies to the responsible
 - ❖ Use authorized and validated methods prior to testing, if applicable
- ❖ **WORK LOCATION:** Walloon Brabant

ABOUT YOU:

- ❖ Bachelor or Master's in chemistry, bioengineering, technology or environment related
- ❖ Key technical backgrounds: small molecule chromatography (HPLC/UHPLC/GC) and detection techniques (UV/Vis, MS), USP/EP Pharmacopoeias
- ❖ Mandatory skills: team player, exp. in a similar position/environment, compliant/rigorous
- ❖ Language skills: fluent English & French

Do you want to integrate the consulting world into a human-sized company that values the individual and the performance? Do you want to invest in long-term innovative projects? To share your skills in a close-knit team where experiences are shared freely? So, join us! We offer you an attractive salary and fringe benefits. You will work in a stimulating international environment, with numerous opportunities for personal development.
