

100 %

dedicated to the Pharma and Biotech sector

ABOUT US:

For nearly 15 years, the largest laboratories in the world have been showing their confidence in our company. Specialized in pharma, biotech and medical devices, we support our customers from research to product launch. We cultivate a human-scale company spirit that allows us to personally follow our 350 employees – each of them known for their technical and scientific expertise. Through our regional subsidiaries in France, Belgium and Switzerland, we offer everyone geographical stability, without a mobility clause in the contracts.

JOB DESCRIPTION:

CONSULTYS BENELUX is looking for an **Equipment Qualification Engineer** to reinforce its Consulting team. As a consultant you will bring your expertise to our customer team. For this particular project, the main objectives are:

- ◆ Create and follow up the required change notifications/CRF
 - ◆ Definition and execution of engineering tests, verification and validation of assigned equipment
 - ◆ Defines the validation approach, creates test protocols for engineering tests, creates verification and validation documents, executes tests, coordinates SME and system owner approvals
 - ◆ Responsible to solve and document deviations and actions (CAPA's, risk assessments, CGMP review, new document versions)
 - ◆ Supports other validations (ECO, SMC, batch records) executed by other departments
 - ◆ Responsible for the CRF, the PE will support the registration process in relation with site compliance if required
 - ◆ Supports documentation of technical specs (Engineering Design Specification or technical spec, P&ID's, electrical diagrams) and reviews with the relevant PE/SME
- ◆ **WORK LOCATION:** Walloon Brabant

ABOUT YOU:

- ◆ Master's degree in engineering or life sciences
- ◆ Good documentation skills, able to deliver clear and complete documents
- ◆ Good communication skills in French and English, Dutch is a plus
- ◆ Pragmatic, shows ownership, pro-active, can take the lead, results focused
- ◆ Quality minded (GMP, risk assessments, verification & validation)
- ◆ Hands-on and good problem-solving skills

Do you want to integrate the consulting world into a human-sized company that values the individual and the performance? Do you want to invest in long-term innovative projects? To share your skills in a close-knit team where experiences are shared freely? So, join us! We offer you an attractive salary and fringe benefits. You will work in a stimulating international environment, with numerous opportunities for personal development.
