

100 %

dedicated to the Pharma and Biotech sector

ABOUT US:

For nearly 15 years, the largest laboratories in the world have been showing their confidence in our company. Specialized in pharma, biotech and medical devices, we support our customers from research to product launch. We cultivate a human-scale company spirit that allows us to personally follow our 350 employees – each of them known for their technical and scientific expertise. Through our regional subsidiaries in France, Belgium and Switzerland, we offer everyone geographical stability, without a mobility clause in the contracts.

JOB DESCRIPTION:

CONSULTYS BENELUX is looking for a **Validation & Planning Engineer** to reinforce its Consulting team. As a consultant you will bring your expertise to our customer team. For this particular project, the main objectives are:

- ◆ Lists validation activities together with the project leader and project engineers
 - ◆ Clarifies the overall project validation strategy to the entire project team
 - ◆ Watches over good validation practices (verification, validation master plan, change management, & GMPs ...) and the quality of the different deliverables
 - ◆ Bridges between Engineering, Site Compliance, SME, System Owner throughout the project
 - ◆ Assist the project lead to compose, consolidate and update a timeline with different milestones
 - ◆ Develop and maintain accurate and complete detailed project schedule file in MS Project
 - ◆ Keep the project team informed regarding the progress of all project tasks and activities and provide input for the management communication & reporting
 - ◆ Alert the project team and Project Management of problems/conflicts relating to the execution of project tasks and activities
 - ◆ Document project risk evaluation & mitigation plans' processes in the Project Risk Management document
- ◆ **WORK LOCATION:** Walloon Brabant

ABOUT YOU:

- ◆ Master's degree in engineering or life sciences
- ◆ Strong analytical ability - Be organized & rigorous - Networking, collaboration - Problem-solving capacity
- ◆ Excellent communication & presentation skills (French fluency + ENG and/or NL)

Do you want to integrate the consulting world into a human-sized company that values the individual and the performance? Do you want to invest in long-term innovative projects? To share your skills in a close-knit team where experiences are shared freely? So, join us! We offer you an attractive salary and fringe benefits. You will work in a stimulating international environment, with numerous opportunities for personal development.
